

# SoundHound And Jersey Mike's Introduce Voice AI Phone Ordering

Customers ordering subs will be able to place orders via a cutting-edge conversational voice assistant

SANTA CLARA, Calif.--(BUSINESS WIRE)--Jan. 24, 2024-- SoundHound AI, Inc. (Nasdaq: SOUN), a global leader in voice artificial intelligence, and [Jersey Mike's Subs](#) today announced that they are working together to give customers the ability to place phone orders for pick-up via a state-of-the-art voice AI ordering system. Optimized for natural human speech, Jersey Mike's customers won't have to modify their language or interact awkwardly with the software – they can just speak naturally as they would to another person.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20240124752799/en/>

Initially live at 50 locations, SoundHound's voice technology has been trained on the entirety of Jersey Mike's menu – from the #17 Mike's Famous Philly through to the #9 Club Supreme – and uses advanced AI to recognize items instantly as customers are talking, allowing the system to take food and drink orders effortlessly and with greater accuracy.

As well as taking orders, SoundHound's sophisticated technology answers a broad range of menu questions (e.g., about specials and promotions), and even provides information about opening times, parking, allergens, and many more FAQs. The AI answers 100% of calls and can even take multiple orders at once. Significantly, this frees up Jersey Mike's employees to focus on making delicious food and giving great service to in-store customers.

*"Jersey Mike's customers know that we strive to provide quality in everything we do. The way we choose technology is no different,"* said Scott Scherer, Chief Information Officer, Jersey Mike's Franchise Systems, Inc. *"AI is becoming an important part of supporting restaurant staff and providing impeccable customer service, so we've partnered with SoundHound because they have the experience and expertise to make sure that our customers get their favorite sub exactly how they like it on time, every time."*

You can check out [a demo of the technology here](#).

[A recent study](#) by SoundHound found that restaurant technology is one of the top three drivers of customer satisfaction, and that nearly 8 in 10 of regular diners in the US believe that most food ordering will be handled by AI voice assistants in the next few years.

*"More than ever, restaurant customers are ordering for pick-up and delivery, and to keep them coming back businesses need to provide a slick, hassle free experience,"* said Keyvan Mohajer, CEO and Co-Founder of SoundHound AI. *"Technology is now a critical part of that, and Jersey Mike's is at the forefront of brands embracing AI to deliver first-class customer service – from when they place the order, to handing over the sub. We're excited to be working with them."*
